

WindPRO 2.7 Service Pack 5 (Build 490)

We hope you are enjoying working with WindPRO version 2.7. However, a few issues have been discovered after the release of Service Pack 4, which can be fixed by installing the new Service Pack 5, now available for download.

The improvements include:

- In the Resource calculation modul several issues regarding stability and usability have been fixed.
- An issue about opening the German help file has been fixed.
- A minor issue about showing the activation statistics has been fixed.
- A minor issue regarding weekdays in the Loss and Uncertainty module has been fixed
- Some translations have been updated.
