

windPRO

Online Post Construction Training:

Analyse wind turbine SCADA data, quantify losses, improve pre-construction estimates and lower your AEP uncertainty.

Program

- 09:00 Introduction of Post Construction in the windPRO V3.4 Performance Check module
- 09:30 Demonstration of new features in windPRO 3.4 – Part 1
- Import & setup of SCADA data
 - Merging of event logs / error codes to production time series
 - Sensitivity tests on Nacelle anemometer wind speed and trend corrections
- 10:30 Short break
- 10:40 Demonstration of new features in windPRO 3.4 – Part 2
- Calculation of lost production
 - Pareto analysis of causes of lost production
 - Long-term correction of potential energy per turbine
 - Future NET yield & reporting
- 12:00 30 min Q&A session

When:

September 16th, 2020 – from 09:00 to 12:30 (CET)

Where:

Web-based training via TEAMS online session

Participant requirements:

None, but recommended for existing windPRO users interested in post construction analyses

Attendance fee:

Euro 150 per participant

Registration:

Sign-up [online](#) or send an e-mail to emd@emd.dk confirming your attendance
