

## WindSight launch webinar – Novel data package for wind models

### Description

Released in June 2020, WindSight propels a new generation of detailed, accurate, reliable and timely satellite-based data information products to improve, and complement, existing data used in wind models. The novel data suite of WindSight is composed of 5 different high-quality and high-resolution data products on land cover, key forest characteristics, historical and future changes, topography and surface roughness - tailored for wind sites anywhere in the World.

DHI GRAS and EMD International A/S are pleased to invite you to this launch webinar where our experts will introduce you to the 5 core products of the WindSight data suite and explain how these products can be integrated in wind models to substantially increase the accuracy of wind resource assessments.

The agenda for this 1-hour launch webinar is:

- Welcome and introduction (5 min.)
- Introduction to WindSight and the 5 core products in the WindSight data package (15 min.)
- WindSight products in windPRO (15 min.)
- Q&A session (25 min.)

We hope you are as excited about this product as we are, and we look very much forward to seeing you online on September 3rd, 2020 from 10:00 – 11:00 CET.
